

In Association With

National Science Foundation

PRESENT:

High School Student Cyber Security Camp

Directed By:

Dr. John Fernandez

Professor and Associate Director of the School of Engineering and Computing Sciences and Director of the Center for Information Assurance and Cyber Defense

Steve Alves

Cyber Security and Infrastructure Instructor and Director of the Cyber Defense Lab

HS Cyber Security Camp

This week-long camp, offered twice this summer, is designed to give high school students an in-depth look at the fields of cyber security and information assurance. It gives them an opportunity to go through a week of training in computer security workshops, exercises, and classes. Through this program we hope to show high-school students that computer security and information assurance are exciting and rewarding fields attainable through TAMU-CC.

Intermediate:

June 22-26, 2015

Advanced:

July 6-10, 2015

- Monday – Windows 7
 - Discover how to protect and monitor Windows users and defend against viruses
- Tuesday – Windows 7
 - Understand how to keep windows up to date, customize file system access, and use additional programs to enhance security
- Wednesday – Win 7 & Server 2008
 - Learn how to stop attackers while providing access to network users
- Thursday – Server 2008
 - Explore services offered by Windows Server 2008
- Friday – Student Competition and Award Ceremony

Dates:
June 22-26, 2015
& July 6-10, 2015

Learn cyber security while having fun!
